

AEROSPACE

Ground Support Equipment

ISO 9001

BUREAU VERITAS
Certification

Range Of Basic Products

- Hand Operated Pumps
- Compressed Air Operated Pumps & Gas Boosters
- Electrically Driven Pumps & Oil free Compressors
- Stand Alone Kerosene / Diesel Engine Driven systems
- Special Hydraulic Power Pack Systems
- Automation & Control Systems
- Ultra Clean / Oxygen Cleaned High Pressure Accessories
- Hose Reel & Flushing Rigs.
- Ground Powering Systems
- Truck Mounted Systems
- Trolley Systems towed by Electric Prime Mover

HIGH PRESSURE TECHNOLOGY

We have basic core products and expertise for designing and manufacturing state of the art high pressure hydraulic and pneumatic ground support equipment, for the aerospace industry with a proven track record for ergonomics, quality and safety.

Air / Nitrogen / Helium Oxygen Charging: PLC or simple, portable or trolley / truck mounted, Air Driven Gas Booster / Non Lubricated 'Oil Free' Electric Compressor systems to quickly charge high pressure accumulators, struts, tyres, pneumatic systems with multiple filling points at operator adjustable pressure. We also make 'Bootstrapped' helicopter floatation gear charging systems, portable high pressure gas receivers and regulated distribution system for pneumatic pressure / leak testing after retrofitting airborne components.

accumulators, struts, tyres, pneumatic systems with multiple filling points at operator adjustable pressure. We also make 'Bootstrapped' helicopter floatation gear charging systems, portable high pressure gas receivers and regulated distribution system for pneumatic pressure / leak testing after retrofitting airborne components.

APU / Engine Starting Systems : Trolley / truck mounted high pressure pneumatic starting systems for APU / Engine starting.

Thermal Imaging & Seeker System Charging: Truck / Trolley mounted systems with on-board high purity Nitrogen generation & high pressure charging system for charging airborne thermal imaging and seeker system accumulators as per DEF STAN 58/96.

Hydraulic Discipline / Hydrostatic Testing: PLC or simple, portable or trolley / truck mounted, high pressure hydraulic pressure packs, ground powering solutions for control actuation, in situ hydro static pressure testing / leak check after retrofitting of high pressure components.

Safety Check & Re-lifting: High pressure test systems that facilitate safety checks and re-lifting of airborne high pressure gas cylinders, accumulators and other components.

GEM PRESSURE SYSTEMS (INDIA) PVT. LTD.

Office :
4-2-254, Old Bhoiguda,
Secunderabad - 500003
Phone : 040-27711742, 27700326
Telefax : 040-27711742

Factory :
5-11, Sharif Nagar
RCI Road, Hyderabad - 500005.
R. C. Dist. Telangana, India
