

CHEMICAL DOSING & INJECTION SYSTEM

HIGH PRESSURE TECHNOLOGY

Key Specifications:

- *High accuracy Chemical Dosing & Injection Skid*
- *Available in Air and Electrical operated*
- *High Pressure Dosing of up to 500 Bar*
- *Available for wide range of chemicals and liquids*
- *Precisely adjustable with Mass Flow Controller*
- *Completely flameproof for using the equipment in Hazardous locations like Oil & Gas*
- *Built in Stainless Steel, robust structure*
- *Remote operation with MODBUS communication*
- *Unmanned control for remote locations*
- *Mass flow totalizer*

Our Major Clients:

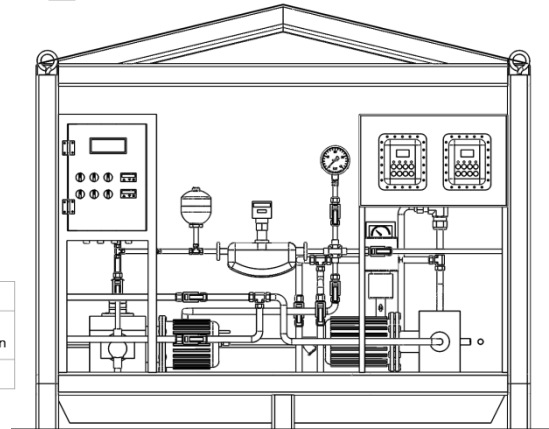

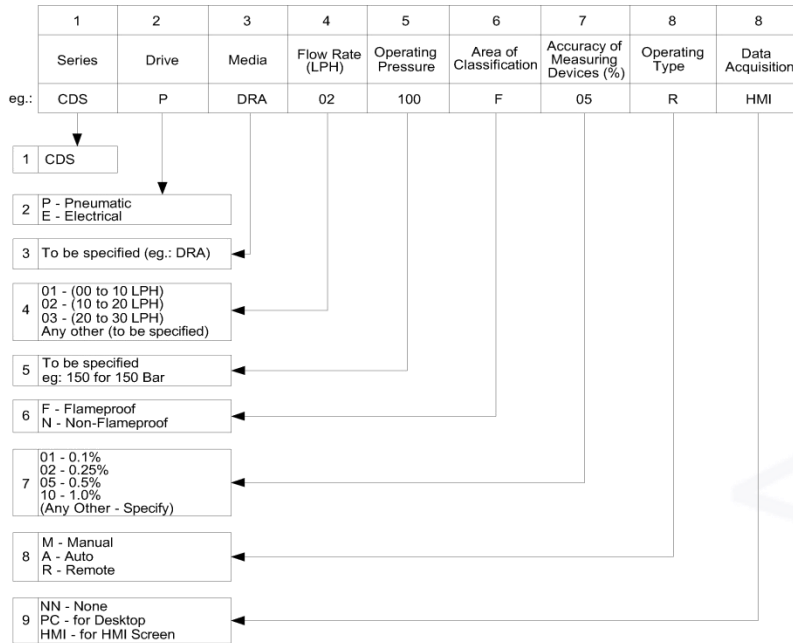

Chemical Dosing and Injection systems are widely used to inject small amounts of chemicals or liquids into high pressure pipelines mainly in the fields of Oil & Gas.

GEM has successfully developed, supplied & proved remote operative Chemical Dosing System which are operable via Modbus communication.
